- Need a different description than "a leading voice in low income..." and also need to change the bullet points. Need to be about the company rather than advantages of solar. You can use "40 Years of Expertise You Can Trust", "Service Excellence That Powers Your Future", "Maximum Savings, Minimum Solar Costs(if you think of something better, please feel free to put that in)"

02

The description under these 3 still needs to be changed. For Choose Pricing, you can write "Pick the perfect solar plan that fits your budget and energy needs with transparent, hassle-free options". For Get Solar, use "Our experts handle the installation process efficiently, ensuring a seamless transition to solar energy". For Enjoy Power, replace the heading with Power Your Future. For description, use "Start saving instantly with clean, renewable energy powering your home or business".

- For this, just the title needs changed. Use "Smart Solar Power Solutions"

Under Services Page, Industrial's and Commercial's description does not relate it to Solar Power much. Please see if you can change this. The description under Residential looks very good. And the pictures are also good. Please put Benefits under all 3 categories and use Frelit Energy's website as a resource as we had talked about earlier. Please make the Quote in

a colored box. Maybe use the same dark green color, and see if it looks good. Also the words needs to have the first letter capitalized.
